

Environmental Policy

CAGroup is Australia's premier manufacturer of tin and lead based products, extruded lead products and building products. CAGroup is a recycler of scrap lead, solder products and other non-ferrous metals.

CAGroup is committed to pursuing the highest standard of environmental management throughout its operations. CAGroup strives for continual improvement in our environmental performance, the efficient use of resources and the minimisation or prevention of pollution. CAGroup actively supports the protection of the environment and the role that recycling plays in conserving natural resources.

These principles are met by adhering to the following:

- CAGroup strives to achieve industry best practice.
- Environmental performance will meet or exceed regulatory requirements laid down in CAGroups EPA license.
- CAGroup will regularly monitor its performance, objectives, targets, ensuring that support functions exist to effectively maintain and continually improve environmental standards.
- Employees and contractors working on behalf of CAGroup will act in an environmentally responsible manner, and will be instructed and trained accordingly.
- CAGroup will control and manage environmental risks from its operations by implementing systems to identify, assess, control and monitor those environmental risks.
- Resources such as energy, water, raw materials and consumables will be used as efficiently as practical and the amount of waste generated will be minimized to the best extent practicable.

The ultimate success of this Environmental Policy lies with the commitment and dedication of each and every one of CAGroups employees. Management at all levels will actively encourage the implementation of these broad principles within their areas of the business and ensure that all of the Environmental Procedures laid down by CAGroup are observed.
